TripKIRA

Driver Training Guide

A safe, simple routine for every working day

TripKIRA v3.33 only | Guide version 2.0 | 10 Oct 2026

Quick Start - One Page

1 Register

Tap REGISTRATION, complete the Google Form and wait for your Membership ID.

2 Save your ID

Open Odometer / Member. Enter the exact Membership ID and your start-work odometer.

3 Activate once

Tap SEND CODE, check the registered Gmail, enter the 6-digit OTP and tap VERIFY DEVICE.

4 Start each job

While safely stopped, select ID, AR, BO, GB or Others, then tap START.

5 End each job

At the destination, tap END, enter the fare, add an optional remark and tap Save Trip.

6 Finish and share

Enter the end-day odometer, then press the green SAVE/SHARE button and wait for success.

Success check: Do not close, clear app data or uninstall until TripKIRA says the share was completed successfully.

Safety first: Only use TripKIRA while the vehicle is safely stopped.

1. First-time registration and secure activation

TripKIRA v3.33

TripKIRA v3.33 production workflow

Register and receive your Membership ID

- Tap REGISTRATION and complete the Google Form using a Gmail address you can access.
- After approval, you will receive a Membership ID such as MY-M1403-0001.
- The Membership ID identifies your driver account. It is not a password.
- Open Odometer / Member, enter the ID exactly, enter the start-work odometer if available, then tap Save.

Activate this phone

- When Secure Device Activation opens, tap SEND CODE.
- Check the Gmail address registered to that Membership ID, including the Spam folder.
- Enter the 6-digit code and tap VERIFY DEVICE.
- The OTP is valid for 10 minutes. Wait 60 seconds before resending. A maximum of 5 wrong attempts is allowed.
- Only one phone can be active for each Membership ID. Activating a new phone invalidates the old phone's token.

Never share your OTP. T Points, TRex, Inbox, Redemption and Share are protected by device activation.

This guide applies only to TripKIRA v3.33. Button names and procedures follow the **current production workflow.**

2. Set up TripKIRA before starting work

TripKIRA v3.33

TripKIRA v3.33 production workflow

At the beginning of the working day

- Open TripKIRA and allow the branded splash and personalised greeting to finish. The greeting uses your registered display name.
- If today's Daily Check-In has not been claimed, collect it from the automatic popup before starting work.
- Turn on Internet, Location and Precise Location, and allow TripKIRA to use location while the app is open.
- Open Odometer / Member. Confirm the exact Membership ID and enter the vehicle's start-work odometer.
- Tap Save. The end-day odometer can stay blank until you finish work.
- Choose English, Bahasa Malaysia or Chinese with the language button.
- Set Dark/Light mode and Voice ON/OFF according to your preference.
- Use Settings for app preferences and Help to open the latest driver-support information.
- Confirm that the screen shows STATUS: NOT STARTED before accepting the first job.

For a platform not listed, tap Others and enter its name.

3. Record every completed job

TripKIRA v3.33

TripKIRA v3.33 production workflow

Use the same sequence for every trip

- At the pickup point and while safely stopped, select the correct platform.
- Tap START. Wait for TripKIRA to capture Point A, the time, GPS and address.
- Drive the passenger to the destination.
- At the destination and while safely stopped, tap END.
- Enter the fare under Price (RM). Remarks / Comment is optional.
- Tap Save Trip. TripKIRA stores the completed job on the phone until the end-of-day share succeeds.
- Repeat these steps for the next job.

Job Review colours

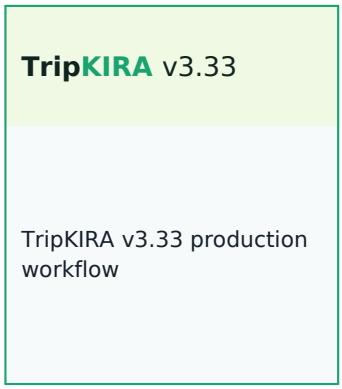

GREEN	Efficient trip - similar jobs may be worthwhile.
YELLOW	Average efficiency - consider demand and waiting time.
RED	Low efficiency - review the fare, distance and time before taking similar jobs.

CLEAR cancels the current active trip so you can restart Point A. Use it only when you started the wrong trip; it is not the end-of-day Share button.

4. Finish work and share the day's trips

End-of-day procedure

- After the final job, press the green SAVE/SHARE button.
- If the end-day odometer is blank, TripKIRA opens Daily Odometer. Enter the final odometer and tap Save.
- Keep the app open and maintain a stable Internet connection while the upload is running.
- Wait for Share completed successfully. The result shows trips shared, T Points earned, total balance and any new TRex badge.
- Only after a successful upload does TripKIRA clear the shared completed trips and daily odometer values. Your Membership ID remains saved.
- If sharing fails, the completed trips remain on the phone. Check the Internet and retry; do not uninstall or clear app storage.
- TripKIRA validates the start and end odometer before sharing. Correct any missing or invalid value shown by the app.

TripKIRA v3.33 production workflow

Your shift is complete only after the success message appears.

5. Check performance, messages and driver tools

TripKIRA v3.33

TripKIRA v3.33 production workflow

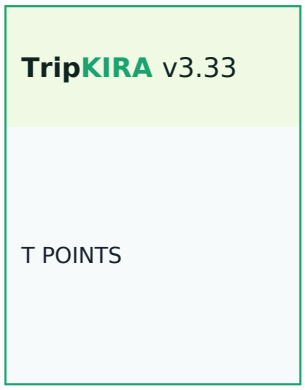

TODAY'S PERFORMANCE

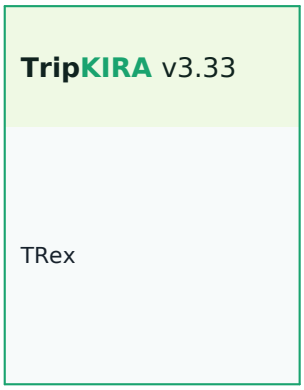

- Open TODAY'S PERFORMANCE to see today's summary.
- Use TODAY and LAST 7 DAYS to review trips, total fare, estimated KM and platform breakdowns.
- Green, yellow and red counts help you see the mix of trip results.
- Estimated KM is an app estimate and may differ from the vehicle odometer or actual road route.

IN BOX

- The number on IN BOX shows unread messages.
- Messages may be for all drivers or only your Membership ID.
- Tap OPEN LINK to open an attached PDF, Google document, video or webpage.
- Tap REFRESH when you need the newest information.
- If Daily Check-In was not claimed at startup, collect the day's reward from the Inbox screen.

6. Understand T Points and TRex

T POINTS

- Shows current balance, level, points earned this month, lifetime points, redeemed points and recent activity.
- Available rewards appear in the same screen. REDEEM REWARD becomes available when your balance is sufficient.
- Tap REFRESH to retrieve the latest cloud balance.

TRex

- Shows your lifetime completed trips and progress toward the next badge.
- Milestone badges unlock at 50, 100, 200 and every 100 trips up to 1,000.
- A new badge can appear after a successful Share.
- Each newly crossed milestone also awards matching bonus T Points: 50, 100, 200 and every 100 up to 1,000.
- If one Share crosses several new milestones, all eligible badge rewards are awarded.

Current T Points earning guide

Condition	Points
Normal genuine job	10 T Points
Saturday or Sunday, estimated road distance 40 KM or below	20 T Points
Monday-Friday, 06:00-09:59 or 17:00-20:59, 40 KM or below	20 T Points
Estimated road distance above 40 KM	40 T Points
Test trip below 0.30 KM GPS straight distance	0 T Points

Multipliers do not stack. The long-distance rule takes priority.

7. Troubleshooting, safety and group support

Common problems

Problem	What to do
OTP not received	Check the registered Gmail and Spam folder, confirm the Membership ID, wait 60 seconds, then resend.
OTP rejected	Use the newest 6-digit code within 10 minutes. Request a new code if it expired.
GPS not ready	Enable Location and Precise Location, grant permission, move to an open area and wait before pressing START or END again.
No trip data to share	Confirm that at least one trip was ended and saved with a valid fare.
Share failed	Keep the app and data unchanged, restore Internet access and retry.
Points, TRex or Inbox not loading	Confirm the exact Membership ID and active device, then tap REFRESH.
Using a new phone	Enter the same Membership ID and activate the new phone with a fresh OTP. The old phone will no longer be active.

Safety first: Only use TripKIRA while the vehicle is safely stopped.

- Do not operate TripKIRA while the vehicle is moving.
- Do not share your Gmail OTP with anyone.
- Do not enter another driver's Membership ID.
- Do not clear app storage or uninstall before a failed share is successfully retried.

Message for the drivers' group

> Hi, driver friends! If you have any questions or need help using TripKIRA, please feel free to ask in this group. We will do our best to help.
